

Stories from the Ground - PAUD Persaudaraan 2021/2022 Academic Year

prepared for ANSAC

PAUD Persaudaraan is located in Gorontalo Village, West Manggarai District, Flores.

Despite the fact that Gorontalo Village only has two PAUDs, PAUD Persaudaraan is a well-liked school where children can enroll in early childhood education. The benefits that can be provided include the high standard of learning and the variety of indoor and outdoor activities that are available in school.

PAUD Persaudaraan was established in 2011 to provide early childhood education for the children in Gorontalo Village, West Manggarai Regency, East Nusa Tenggara.

For almost eight years since its establishment, the school conducts its learning activities at a rented building.

The building has 4 small classrooms which are not sufficient to accommodate the students enrolled in this school. Some of them have to learn at an emergency porch that is recently built in front of the school.

In 2019, HHI rebuilt two classrooms equipped with proper furniture and a toilet. Since then, the students have been able to study in safer and more comfortable classrooms.

TRANSFORMATION

Then - before rebuilding

2019 - after rebuilding

TRANSFORMATION

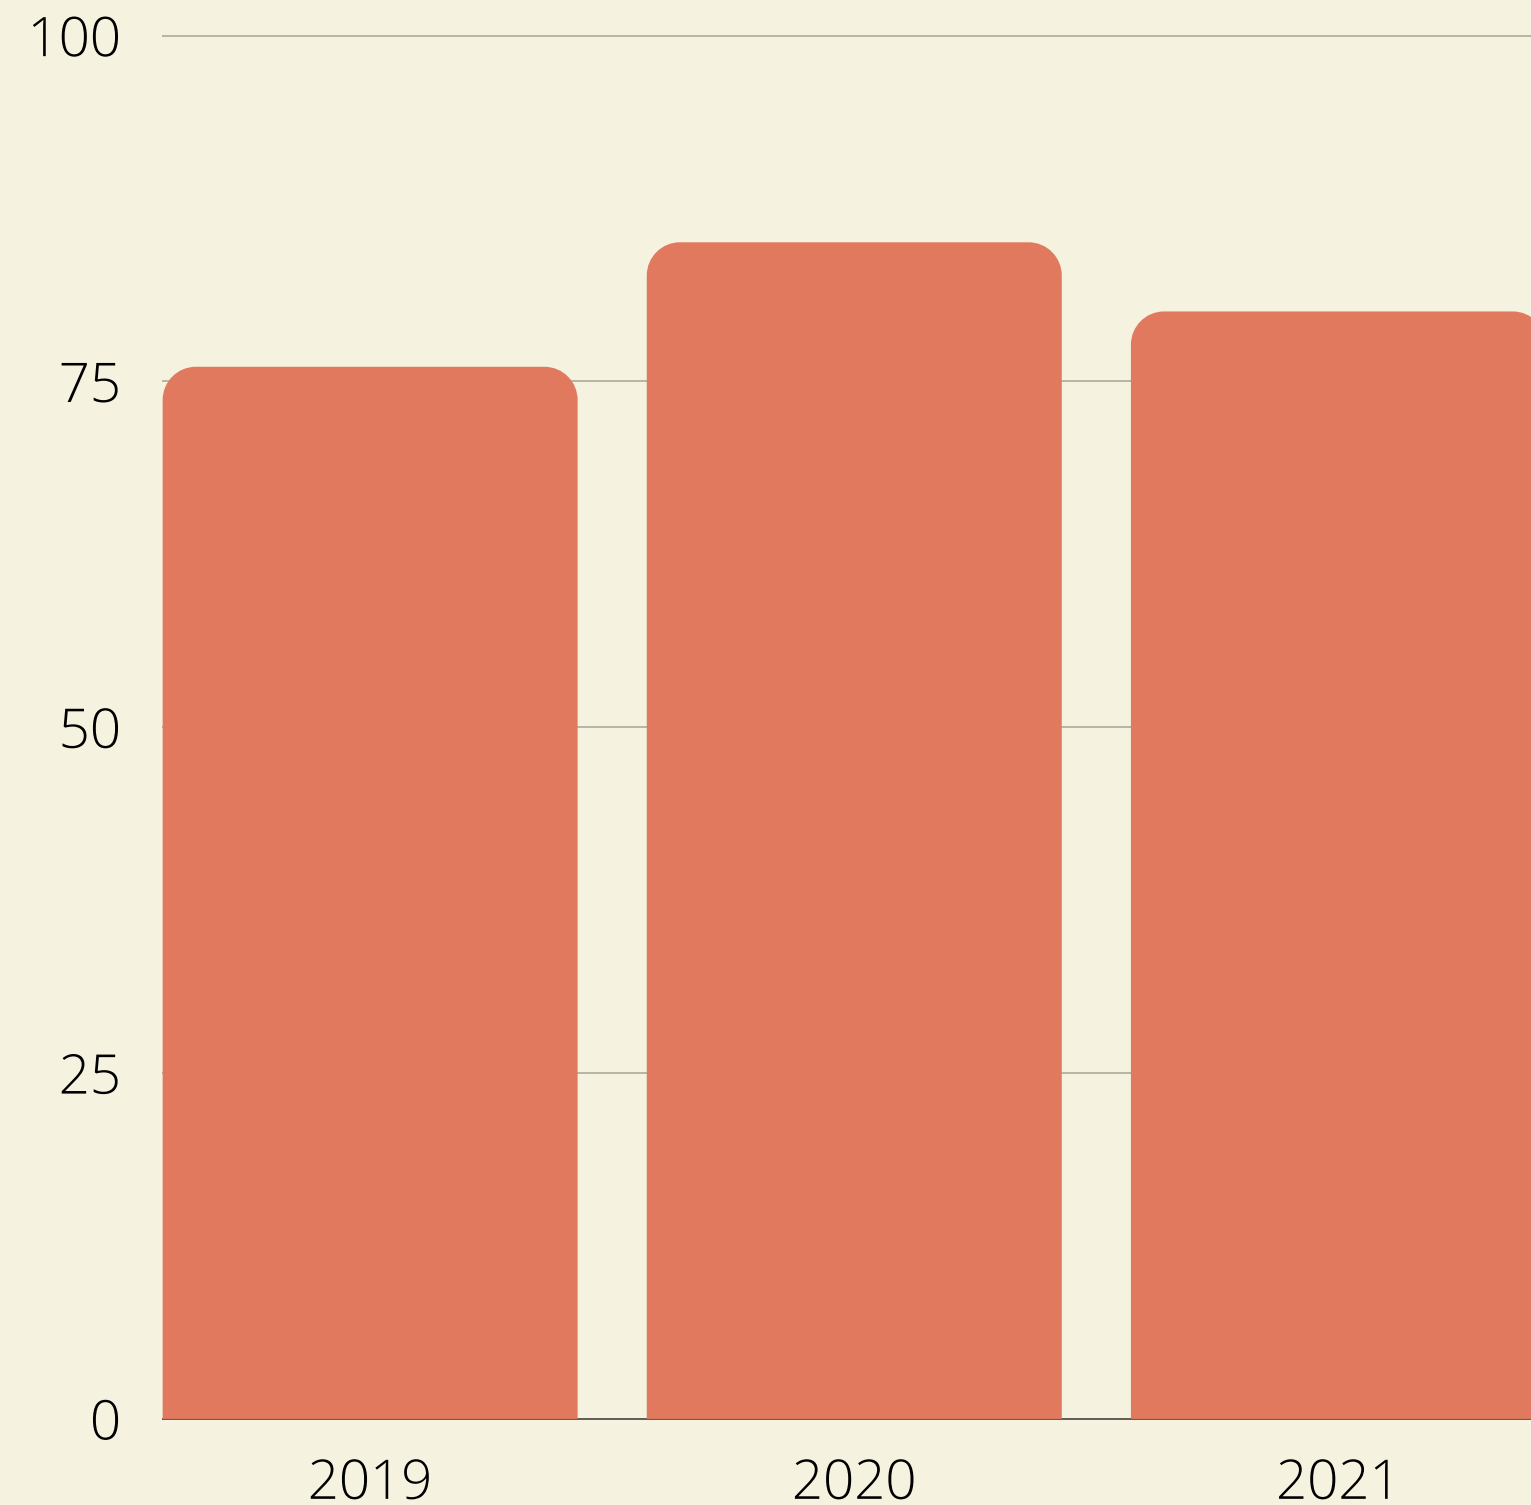

Current condition

However, the two classes that HHI have built are insufficient to accommodate the entire students. Currently, learning activities are arranged into 5 groups, with 2 groups for children ages 3-5 using 2 classrooms and the other 3 using the school's terrace.

In addition, until now this school does not have a teacher's room, even though the teacher's room is important for the accreditation process.

Before the school was built the number of students reached 76 students.

Each academic year, more students enroll than the available space can accommodate.

There were 80 students enrolled for the 2021-2022 school year. In June 2022, 60 among those 80 students achieved their graduation and finished their education.

The school is currently taking on new student registrations, and so far 68 new students have done so. This indicates that 90 students could enroll for the 2022-2023 academic year.

HIGHLIGHTES

60 students successfully graduated from school

Children who excel in school receive special award certificates

HIGHLIGHTES

Field trip activities are routinely carried out at the end of each semester

In collaboration with the local health unit, routine vaccination and nutritional food program are carried out
